in Editorial Collaboration with the Indian Physical Society)*

INDIAN JOURNAL OF PHYSICS

AUTHOR INDEX*

Volume 81

(2007)

The following *abbreviations* are used :

- (N) 'Note'
- (P) *Proceedings of the Symposium on Condensed Matter Days - 2005 (CMDAYS-05) organised by the Department of Physics, Berhampur University, Berhampur-760 007, Orissa, India held at the St. Vincent Retreat at Gopalpur on-sea, India during August 29-31, 2005*
- (R) 'Review'
- (S1) *Special Issue on Atomic and Molecular Physics – Part I*
- (S2) *Special Issue on Atomic and Molecular Physics – Part II*

Author	Subject	Page
A		
Acharya Anjana	Three-body formalism for deuteron stripping reactions on ^{40}Ca	803–817
Ahuja B L (and Khera S)	A Compton profile study of praseodymium and erbium	321–330
Al-Awfi Saud	Effect of phase fluctuations of a laser on the dynamic process of an atom near a metallic layer	241–250
Anurag, (Tewari Ashutosh and Khanna K N)	Shear viscosity of square – well fluid	1295–1302

B

- Bayal Nirmalya, (Chanda Arunabha and Mazumdar Asis)* Numerical investigation on hydrodynamic developement length of gaseous flow in parallel plate micro channel 673-681
- Behera Banarji, (Nayak P and Choudhary R N P)* Dielectric and electrical properties of $\text{NaBa}_2\text{V}_5\text{O}_{15}$ ceramic (P) 63-67
- Bera P K (and Datta J)* Unified approaches for construction of PT-symmetric quasi-exactly solvable potentials 377-388
- Bhadauriya Preeti* Equations of state and thermoelastic properties of the Earth's lower mantle 573-584
- Bhattacharjee B, (Debnath B, Mukhopadhyay A and Sengupta S)* Erraticity moment of bin multiplicity and rapidity gap of fast TFs from $^{84}\text{Kr-Ag/Br}$ interaction at 0.95A GeV/c 717-726
- Bhattacharjee J K, (Mallik A K and Chakraborty Sagar)* An introduction to nonlinear oscillators : a pedagogical review (R) 1115-1175
- Bhattacharya R, (Das R, Guha R, De S and Bhattacharya A B)* Blue jet models and associated lightning flashes 757-766
- Bhaumik Uma* Study of DM interaction in triangular lattice (P) 75-81
- Bhunia S, (Biswas S, Sarkar D and Sarkar P P)* Experimental investigation on dual-frequency broad band microstrip antenna with swastika slot 495-497
- Bishoyi K C, (Rout G C and Behera S N)* Study of magnetism and hybridization through ultrasonic attenuation in cuprate systems (P) 47-53
- Biswas Anup Kumar, (Gautam M A, Kumar K Senthil, Sarkar Souvik and Sarkar Subir Kumar)* ASIC VLSI chip using single electron transistors for traffic control system 1257-1265
- Bordoloi A K, (Mahanta D, Dolui S K and Choudhury A)* Optical and electrical properties of chemically grown ZnS quantum dots (P) 89-93

C

- Chakrabarti S, (Sasmal S, Saha M, Khan R, Bhounmik D and Chakrabarti S K)* Unusual behavior of *D*-region ionization time at 18.2kHz during seismically active days 531-538
- Chammasheril C J (and Vinodkumar P C)* Sensitivity of nuclear matter EOS parameters on neutron star properties 793-801

<i>Chattaraj P K (and Giri S)</i>	A minimum electrophilicity perspective of the HSAB principle (S1)	871-879
<i>Chattopadhyay Sudip, Sinha Mahapatra Uttam and Chaudhuri Rajat K)</i>	Study of isolated $1\ 1\text{ Al}^{+3}\text{ He}$ complex using many-body perturbation theory A multi-reference approach (S2)	1023-1037
<i>Choudhary S N, (Prasad K, Kumar A and Choudhary R N P)</i>	Vogel-Fulcher like dielectric response in $\text{Pb}[(\text{Mg,Zn})_{1/3}\text{Nb}_{2/3}]\text{O}_3$ ceramic (P)	109-116
<i>Choudhury (K D and Dhar Pijush Kanti)</i>	An improved analysis of deep inelastic neutrino data with the DGLAP equations at low and high x	259-274
<i>Choudhury D K (and Dhar Pijush Kanti)</i>	Non-singlet structure function at low and high x in the next-to-leading order and CCFR neutrino data	819-830
<i>Choudhury D K (and Gogoi Rupjyoti)</i>	Deep inelastic neutrino scattering and fractal models of nucleon structure functions at small x	607-614

D

<i>Das C (and Bhattacharyya K)</i>	Force, uantum mechanics and approximate energy eigenstates (S2)	1039-1059
<i>Das U, (Mohanta D, Singh F, Tripathi A, Avasthi D K and Choudhury A)</i>	Transition metal doped ZnS nanoparticle systems and their response to swift heavy ion irradiation (P)	155-159
<i>Dave Roshni (and Pandey R)</i>	The temporal periodic variations of the total ozone content at Udaipur a near tropical station	437-443
<i>Devi K Nomita, (Sarma H Nandakumar and Kumar Sanjiv)</i>	Elemental analysis of some antioxidant-rich medicinal Zingiberales of Manipur using proton induced X-ray emission (PIXE) technique	371-376
<i>Dhara Asish K (and Ghosh Swapan K)</i>	Operator equation of motion in phase space and path integral solution to time-dependent systems possessing invariants Application to time-dependent harmonic oscillator (S1)	915-924

G

<i>Gajjar P N, (Mishra S R and Jani A R)</i>	Electrical resistivity of liquid K-Rb-Cs alloys (P)	125-129
<i>George F, (Kumar T J Dhilip and Kumar Sanjay)</i>	Scattering resonances in low-energy $\text{H}^+ + \text{CO}$ collisions (S1)	889-900

- Ghosh Dipak, (Deb Argha and Das Rupa)* Void analysis of target residues at SPS energy – evidence of correlation with fractal behaviour 1303–1314
- Ghosh P K, (Ahmed Sk F, Maiti U N and Chattopadhyay K K)* Structural and optical properties of ZnS nanostructured films synthesized via RF-magnetron sputtering technique (*P*) 69–73
- Ghosh Sanjukta, (Kanjilal D and Som T)* Low energy ion irradiation induced modifications in Co/Pt bi-layers (*P*) 83–87
- Goel Sumant, (Bansal Vakul and Kumar Rajendra)* Thermally induced damped vibrations of an orthotropic rectangular plate of variable thickness 465-475
- Goel Sumant, (Bansal Vakul and Kumar Rajendra)* Damped vibrations of a linearly tapered homogeneous orthotropic circular plate 477-484
- Gogoi P, (Konwar K and Baishya B)* Effect of copper interlayer on thermally deposited polycrystalline Ge-thin film transistors fabricated on glass substrates 567–572
- Gopalakrishna G S, (Mahesh M J and Ashamanjari K G)* Thermal and magnetic properties of hydrothermally synthesized $K_2 M^{+2}P_2O_7$ crystals ($M^{+2} = Cu$ and Ni) 233–240

J

- Jain Manu* Superposition model analysis for the zero-field splitting of Mn^{2+} in $La_2Co_3(NO_3)_{12} \cdot 24H_2O$ (*M*) 615–618
- Jana Debnarayan, (Chen Li-Chyong, Chen Chun Wei and Chen Kuei-Hsien)* Ab-initio study of optical conductivity of B_xC_y nano-composite system (*P*) 41–45
- Jangid R A* Dielectric dispersion and relaxation studies of some pure nicotines and their ternary mixtures at a single microwave frequency and temperature 36.5°C 1283–1294
- Joshi Mitesh, (Kumar Manjul, Gajjar P N, Thakore B Y and Jani A R)* Theoretical investigation of shear viscosity of some less simple liquid metals (*P*) 137–141

K

- Khan F Liakath Ali, (Sivagurunathan P, Muhammad G Shakil and Mehrotra S C)* Dielectric relaxation studies of higher order alcohol complexes with alkyl acrylates using time domain reflectometry 665-672

<i>Khan F Liakath Ali, (Sivagurunathan P and Raja S, Kamil Mohamed)</i>	Infrared studies on hydrogen bonding interaction between alkyl esters and <i>p</i> -cresol in carbon tetrachloride	727-736
<i>Kharab Rajesh, (Singh Pardeep and Kumar Ravinder)</i>	Influence of finite range of nuclear interaction on the Coulomb breakup of ^{11}Be	363-370
<i>Kimothi Aradhana, (Tiwari V K, Saxena V K, Saini J S and Bhatnagar D)</i>	Theoretical analysis on the performance of a circular sector microstrip antenna under re-entry conditions	1247-1256
<i>Krishna C B, (Dhall R, Chopra S and Banerjee S)</i>	Futuristic memory device : a theoretical modeling (N)	1315-1322
<i>Kumar Krishna, (Paul Supriyo and Jain Dharmesh)</i>	Rhombic patterns near a bicritical point in periodically forced surface waves (R)	1205-1214
<i>Kundu Kalyan (and Tripathy G S)</i>	Foreword (P)	13
<i>Kushwaha A K (and Kushwaha S S)</i>	Lattice dynamical calculations for selenide spinel	343-349
M		
<i>Mahapatra Sabyasachi</i>	Low-lying states of ^{11}Be and ^{15}C	697-703
<i>Mahajan Madhurika, (Chakravarty Tapas and Khah Sunil K)</i>	Analysis of ferrite based planar array of rectangular patch microstrip antenna in X-band	787-792
<i>Mandal B K, (Bhattacharya N, Neogy C, Deb S K and Nag A)</i>	Study of AC transport processes in RE(Y,Sm, Nd,Dy)BCO HTSC samples in the normal state	655-664
<i>Mehta Nital (and Datta Sambhu N)</i>	Computational strategies for redox processes in condensed phase : Both explicit and implicit solvation treatments (S1)	851-869
<i>Midya S K (and Sarkar H)</i>	Variation of stratospheric ozone with relative humidity and sharp depletion of absolute humidity associated with Nor' wester over Kolkata	217-224
<i>Mishra Rajesh K (and Agarwal Mishra Rekha)</i>	Behaviour of cosmic ray daily variation and solar activity on anomalous days	767-777
<i>Misra Anirban (and Datta Sambhu N)</i>	Relativistic Hamiltonian for neutral atom of spin-1/2 nucleus in homogeneous magnetic field (S1)	881-888

<i>Rout S K (and Panigrahi S)</i>	BaTi _{0.4} Zr _{0.6} O ₃ solid solution : phase formation kinetics and reaction mechanism through solid oxide reaction (P)	143–147

- Rout S K, (Badapanda T, Sinha E and Panigrahi S) Dielectric study on sol gel derived BTZ film deposited by spin coating technique (P) 149–153
- S**
- Sadhukhan Mainak (and Deb B M) Aspects of electron dynamics in a helium atom under an intense laser field (S2) 969–981
- Sahoo S, (Maharana L and Behera B R) The effect of both Z and Z'-mediated flavor-changing neutral currents on $B_s \rightarrow \mu^+ \mu^-$ decay 597–605
- Sahu T Electron transport in barrier delta-doped coupled quantum well structures (P) 17–23
- Sarkar Biplab (and Adhikari Satrajit) The Curl equations for an induced Renner-Teller type model (S1) 925–945
- Sarkar S K Wave propagation phenomena in troposphere : Indian experience (R) 189–215
- Sarkar S K, (Kumar Anil, Ahmed Iqbal, Gupta M M, Prasad M V S N, De Arun K and Das J) Rain attenuation at 13 GHz over the line of sight path situated between Panihati and Barrackpore in eastern India 647–653
- Sarma Amal Kr (and Singh N Nimai) Baryogenesis from inverted hierarchical mass models with tribimaximal mixings 389–394
- Shah A K (and Gajjar P N) Growth and characterization of tungsten substituted molybdenum disulfide (P) 131–135
- Shrivastava S K, (Kailash and Raju K M) Ultrasonic study of highly conducting metals 351–361
- Singh N Shanta, (Singh W Shambhunath, Singh Sh Dorendrajit and Okram G S) Preparation and characterisation of nanocrystalline CdSe 225–231
- Singh Raman K, (Sarma Manabendra and Mishra Manoj K) Approximate construction of local complex potentials for a time dependent wave packet based treatment of vibrational excitation cross-sections in resonant e-N₂, e-CO and e-H₂ scattering (S2) 983–1002
- Singh W Shambhunath, (Singh N Shanta, Soni Ajay, Singh S Dorendrajit, Singh L Robindro and Okram Gunadhor S) Characterisation of ZnS nanocrystals prepared by wet chemical method 1267–1274

- Sreelatha C J, (Satyanarayana Ch and Anuradha P)* Excess refractive index studies on CSA-DMSO binary mixture showing lyophase 779–785
- Suman C K, (Prasad K and Choudhary R N P)* Dielectric relaxation in tungsten-bronze $\text{Pb}_2\text{Bi}_3\text{NdTi}_5\text{O}_{18}$ ferroelectric (P) 117–123

U

- Ubale A U, (Mankar R B, Daryapurkar A S, Raut R R and Sangawar V S)* Structural and optical properties of nanostructured PbS thin films chemically deposited at room temperature 555–565

V

- Varma H R, (Banerjee T and Deshmukh P C)* Selective interchannel coupling as computational strategy to interpret complex atomic spectrum (S2) 1069–1077
- Venugopal Chandu, (Kurian M J, Premnadh V K and Renuka G)* Stability of the lower hybrid drift wave in a multi-ion plasma 445-453

X

- Xavier A Francis, (Balaguru R John Bosco, Raj S Alfred Cecil and Lawrence N)* Lattice dynamics of $\text{Fe}_{0.72}\text{Pd}_{0.2}$ 455-463

Y

- Yadav B S, (Yadav Amit Kumar, Seema and Chand Subhash)* Electronic spectral studies of 2-chloro-6-methylpyridine in various solvents 395–401
- Yadav Jayprakash (and Rafique S M)* Superconducting parameters of metals and alloys : HFP technique (P) 161–165
- Yadav Mahendra Pratap (and Kumar Santosh)* Cosmic ray decreases and geomagnetic storms during 1975-1994 425-435

INDIAN JOURNAL OF PHYSICS

SUBJECT INDEX

Volume 81

(2007)

REVIEWS

Wave propagation phenomena in troposphere : Indian experience

S K SARKAR 189-215

An introduction to nonlinear oscillators : a pedagogical review

J K BHATTACHARJEE, A K MALLIK AND SAGAR CHAKRABORTY 1115-1175

Diffusion and mobility driven instabilities in a reaction-diffusion system :

a review

SYED SHAHED RIAZ AND DEB SHANKAR RAY 1177-1204

Rhombic patterns near a bicritical point in periodically forced surface waves

KRISHNA KUMAR, SUPRIYO PAUL AND DHARMESH JAIN 1205-1214

The effect of magnetic field on wavy roll instability

PINAKI PAL AND KRISHNA KUMAR 1215-1226

ASTROPHYSICS, ATMOSPHERIC & SPACE PHYSICS

Variation of stratospheric ozone with relative humidity and sharp

depletion of absolute humidity associated with Nor' wester over Kolkata

S K MIDYA AND H SARKAR 217-224

A theoretical study on the relationship of radius of maximum wind,

distribution of pressure and wind in a cyclonic storm

A MUTHUCHAMI AND P DHANAVANTHAN 295-305

Nonlinear electromagnetic propagation parameters of the ionosphere

GYAN PRAKASH, ASHUTOSH SHARMA, MAHENDRA P VERMA AND

MAHENDRA SINGH SODHA 307-320

Cosmic ray decreases and geomagnetic storms during 1975-1994

MAHENDRA PRATAP YADAV AND SANTOSH KUMAR 425-435

The temporal periodic variations of the total ozone content at Udaipur, a near tropical station

ROSHNI DAVE AND R PANDEY 437-443

Stability of the lower hybrid drift wave in a multi-ion plasma

CHANDU VENUGOPAL, M J KURIAN, V K PREMNADH AND G RENUKA 445-453

A two-dimensional model study of latitudinal, seasonal and solar activity variation in transition height in the *D*-region

K DURGA PRASAD, T S N SOMAYAJI, P APPALA NAIDU,

D N MADHUSUDHANA RAO, T ARUNAMANI AND M INDIRA DEVI 521-530

Unusual behavior of *D*-region ionization time at 18.2kHz during seismically active days

S CHAKRABARTI, S SASMAL, M SAHA, R KHAN, D BHOUMIK AND

S K CHAKRABARTI 531-538

Rain attenuation at 13 GHz over the line of sight path situated between Panihati and Barrackpore in eastern India

S K SARKAR, ANIL KUMAR, IQBAL AHMED, M M GUPTA, M V S N PRASAD,

ARUN K DE AND J DAS 647-653

Blue jet models and associated lightning flashes

R BHATTACHARYA, R DAS, R GUHA, S DE AND A B BHATTACHARYA 757-766

Behaviour of cosmic ray daily variation and solar activity on anomalous days

RAJESH K MISHRA AND REKHA AGARWAL MISHRA 767-777

Theoretical analysis on the performance of a circular sector microstrip antenna under re-entry conditions

ARADHANA KIMOTHI, V K TIWARI, V K SAXENA, J S SAINI AND

D BHATNAGAR 1247-1256

CONDENSED MATTER & MATERIALS PHYSICS

Preparation and characterisation of nanocrystalline CdSe

N SHANTA SINGH, W SHAMBHUNATH SINGH, SH DORENDRAJIT SINGH
AND G S OKRAM 225–231

Thermal and magnetic properties of hydrothermally synthesized

$K_2 M^{+2}P_2O_7$ crystals ($M^{+2} = Cu$ and Ni)

G S GOPALAKRISHNA, M J MAHESH AND K G ASHAMANJARI 233–240

A Compton profile study of praseodymium and erbium

B L AHUJA AND S KHERA 321–330

Determination of activation energy and order of kinetics at different

temperatures of thermoluminescent Meretrix Castra Marine biogenic shells

V PONNUSAMY, V RAMASAMY, K ANANDALAKSHMI AND M T JOSE 331–341

Lattice dynamical calculations for selenide spinels

A K KUSHWAHA AND S S KUSHWAHA 343–349

Ultrasonic study of highly conducting metals

S K SHRIVASTAVA, KAILASH AND K M RAJU 351–361

Lattice dynamics of $Fe_{0.72}Pd_{0.28}$

A FRANCIS XAVIER, R JOHN BOSCO BALAGURU, S ALFRED CECIL RAJ AND
N LAWRENCE 455–463

Studies on solid polymer electrolyte based on PEO/PVC blends

S RAJENDRAN, RAVISHANKER BABU AND K KANIMOZHI 539–545

Growth and characterization of Cu_3N films deposited by dc
magnetron sputtering

K VENKATA SUBBA REDDY, P SREEDHARA REDDY, A KLEIN,
G VENKATA RAO AND S UTHANNA 547–554

Structural and optical properties of nanostructured PbS thin films
chemically deposited at room temperature

A U UBALE, R B MANKAR, A S DARYAPURKAR, R R RAUT AND
V S SANGAWAR 555–565

Effect of copper interlayer on thermally deposited polycrystalline
Ge-thin film transistors fabricated on glass substrates

P GOGOI, K KONWAR AND B BAISHYA 567–572

Study of AC transport processes in RE(Y,Sm,Nd,Dy)BCO HTSC samples in the normal state

B K MANDAL, N BHATTACHARYA, C NEOGY, S K DEB AND A NAG 655-664

Dielectric relaxation studies of higher order alcohol complexes with alkyl acrylates using time domain reflectometry

F LIAKATH ALI KHAN, P SIVAGURUNATHAN, G SHAKIL MUHAMMAD AND S C MEHROTRA 665-672

Excess refractive index studies on CSA-DMSO binary mixture showing lyophase

C J SREELATHA, CH SATYANARAYANA AND P ANURADHA 779-785

Analysis of ferrite based planar array of rectangular patch microstrip antenna in X-band

MADHURIKA MAHAJAN, TAPAS CHAKRAVARTY AND SUNIL K KHAH 787-792

ASIC VLSI chip using single electron transistors for traffic control system

ANUP KUMAR BISWAS, M A GAUTAM, K SENTHIL KUMAR, SOUVIK SARKAR AND SUBIR KUMAR SARKAR 1257-1266

Characterisation of ZnS nanocrystals prepared by wet chemical method

W SHAMBHUNATH SINGH, N SHANTA SINGH, AJAY SONI, S DORENDRAJIT SINGH, L ROBINDRO SINGH AND GUNADHOR S OKRAM 1267-1274

Study of $\text{Cu}_x\text{Ba}_{1-x}\text{TiO}_3$ ceramic system

JITENDRA PAL SINGH, U C JOHRI AND PREM CHAND 1275-1282

Dielectric dispersion and relaxation studies of some pure nicotines and their ternary mixtures at a single microwave frequency and temperature 36.5°C

R A JANGID 1283-1294

GENERAL & INTERDISCIPLINARY PHYSICS

Thermally induced damped vibrations of an orthotropic rectangular plate of variable thickness

SUMANT GOEL, VAKUL BANSAL AND RAJENDRA KUMAR 465-475

Damped vibrations of a linearly tapered homogeneous orthotropic circular plate

SUMANT GOEL, VAKUL BANSAL AND RAJENDRA KUMAR 477-484

Equations of state and thermoelastic properties of the Earth's lower mantle

PREETI BHADAURIYA

573–584

Shear viscosity of square – well fluid

ANURAG, ASHUTOSH TEWARI AND K N KHANNA

1295–1302

NONLINEAR DYNAMICS & COMPLEX SYSTEMS

Numerical investigation on hydrodynamic development length of gaseous flow in parallel plate micro channel

NIRMALYA BAYAL, ARUNABHA CHANDA AND ASIS MAZUMDAR

673–681

NUCLEAR PHYSICS

Influence of finite range of nuclear interaction on the Coulomb breakup of ^{11}Be

RAJESH KHARAB, PARDEEP SINGH AND RAVINDER KUMAR

363–370

Elemental analysis of some antioxidant-rich medicinal Zingiberales of Manipur using proton induced X-ray emission (PIXE) technique

K NOMITA DEVI, H NANDAKUMAR SARMA AND SANJIV KUMAR

371–376

Calculations of longitudinal form factors of p -shell nuclei, using enlarged model space including core-polarization effects with realistic two-body effective interaction

R A RADHI, A K HAMOUDI AND K S JASSIM . .

683–695

Low-lying states of ^{11}Be and ^{15}C

SABYASACHI MAHAPATRA .

697–703

Electric dipole transitions for some excited states in neutral silver

LEYLA OZDEMIR, BETUL KARAÇOBAN AND GULDEM URER

705–715

Erraticity moment of bin multiplicity and rapidity gap of fast TFs from ^{84}Kr -Ag/Br interaction at 0.95A GeV/c

B BHATTACHARJEE, B DEBNATH, A MUKHOPADHYAY AND S SENGUPTA

717–726

Sensitivity of nuclear matter EOS parameters on neutron star properties

C J CHAMMASHERIL AND P C VINODKUMAR .

793–801

- Three-body formalism for deuteron stripping reactions on ^{40}Ca
 ANJANA ACHARYA 803–817
- Void analysis of target residues at SPS energy – evidence of
 correlation with fractal behaviour
 DIPAK GHOSH, ARGHA DEB AND RUPA DAS 1303–1314

OPTICS & SPECTROSCOPY

- Effect of phase fluctuations of a laser on the dynamic process of an
 atom near a metallic layer
 SAUD AL-AWFI 241–250
- Electronic excitation energy quenching of indole derivative by
 CCl_4 in different solvents
 S V NISHTI, R S KUNABENCHI, H M SURESH KUMAR,
 S M HANAGODIMATH AND J S BIRADAR 251–258
- Electronic spectral studies of 2-chloro-6-methylpyridine in various
 solvents
 B S YADAV, AMIT KUMAR YADAV, SEEMA AND SUBHASH CHAND 395–401
- Infrared studies on hydrogen bonding interaction between alkyl esters
 and *p*-cresol in carbon tetrachloride
 F LIAKATH ALI KHAN, P SIVAGURUNATHAN AND S RAJA MOHAMED KAMIL 727–736

PARTICLE PHYSICS

- An improved analysis of deep inelastic neutrino data with the DGLAP
 equations at low and high x
 D K CHOUDHURY AND PIJUSH KANTI DHAR 259–274
- Unified approaches for construction of PT-symmetric quasi-exactly
 solvable potentials
 P K BERA AND J DATTA 377–388
- Baryogenesis from inverted hierarchical mass models with
 tribimaximal mixings
 AMAL KR SARMA AND N NIMAI SINGH 389–394

The dual gluon propagator and confinement potential in SU(2) QCD

HEMWATI NANDAN 585–595

The effect of both Z and Z'-mediated flavor-changing neutral currents

on $B_s \rightarrow \mu^+ \mu^-$ decay

S SAHOO, L MAHARANA AND B R BEHERA 597–605

Deep inelastic neutrino scattering and fractal models of nucleon
structure functions at small x

D K CHOUDHURY AND RUPJYOTI GOGOI 607–614

Non-singlet structure function at low and high x in the next-to-leading
order and CCFR neutrino data

D K CHOUDHURY AND PIJUSH KANTI DHAR 819–830

RELATIVITY & COSMOLOGY

Analysis of the spacetime singularities arising in higher dimensional
monopole-Vaidya Collapse

K D PATIL, U S THOOL AND A N MOHOD 485–493

NOTES

Experimental investigation on dual-frequency broad band microstrip
antenna with swastika slot

S BHUNIA, S BISWAS, D SARKAR AND P P SARKAR 495–497

Superposition model analysis for the zero-field splitting of Mn^{2+} in
 $La_2Co_3(NO_3)_{12} \cdot 24H_2O$

MANU JAIN 615–618

The study of interplay of charge density wave and spin density
wave in cuprate systems

S K PANDA AND G C ROUT 619–626

Futuristic memory device : a theoretical modeling

C B KRISHNA, R DHALL, S CHOPRA AND S BANERJEE 1315–1322

PROCEEDINGS

Proceedings of the Symposium on Condensed Matter Days - 2005 (CMDAYS-05) organised by the Department of Physics, Berhampur University, Berhampur-760 007, Orissa, India held at the St. Vincent Retreat at Gopalpur on-sea, India during August 29-31, 2005

Foreword

KALYAN KUNDU AND G S TRIPATHY 13

Invited Papers

Electron transport in barrier delta-doped coupled quantum well structures

T SAHU 17–23

Heavy-fermion systems

PRASANTA K MISRA 25–31

Contributed Papers

Thermodynamic properties and alloying behaviour of liquid binary alloy :
CdZn

S M RAFIQUE AND ASHWANI KUMAR 35–39

Ab-initio study of optical conductivity of B_xC_y nano-composite system

DEBNARAYAN JANA, LI-CHYONG CHEN, CHUN WEI CHEN AND

KUEI-HSIEN CHEN 41–45

Study of magnetism and hybridization through ultrasonic attenuation in
cuprate systems

K C BISHOYI, G C ROUT AND S N BEHERA 47–53

Study of superconductivity and antiferromagnetism gaps in cuprates

S K PANDA AND G C ROUT 55–61

Dielectric and electrical properties of $NaBa_2V_5O_{15}$ ceramic

BANARJI BEHERA, P NAYAK AND R N P CHOUDHARY 63–67

Structural and optical properties of ZnS nanostructured films synthesized
via RF-magnetron sputtering technique

P K GHOSH, SK F AHMED, U N MAITI AND K K CHATTOPADHYAY 69–73

<i>Subject Index</i>	1351
Study of DM interaction in triangular lattice UMA BHAUMIK	75–81
Low energy ion irradiation induced modifications in Co/Pt bi-layers SANJUKTA GHOSH, D KANJILAL AND T SOM	83–87
Optical and electrical properties of chemically grown ZnS quantum dots A K BORDOLOI, D MAHANTA, S K DOLUI AND A CHOUDHURY	89–93
Synthesis of hydroxyapatite at low temperature T R RAUTRAY, V VIJAYAN AND S PANIGRAHI	95–98
Analysis of human bone and teeth T R RAUTRAY, SATRUJIT MISHRA, S K PATNAIK, V VIJAYAN AND S PANIGRAHI	99–102
AC impedance analysis of modified PbTiO ₃ ceramic K PRASAD, LILY, K KUMARI AND C K SUMAN	103–108
Vogel-Fulcher like dielectric response in Pb[(Mg,Zn) _{1/3} Nb _{2/3}]O ₃ ceramic S N CHOUDHARY, K PRASAD, A KUMAR AND R N P CHOUDHARY	109–116
Dielectric relaxation in tungsten-bronze Pb ₂ Bi ₃ NdTi ₅ O ₁₈ ferroelectric C K SUMAN, K PRASAD AND R N P CHOUDHARY	117–123
Electrical resistivity of liquid K-Rb-Cs alloys P N GAJJAR, S R MISHRA AND A R JANI .	125–129
Growth and characterization of tungsten substituted molybdenum disulfide A K SHAH AND P N GAJJAR .	131–135
Theoretical investigation of shear viscosity of some less simple liquid metals MITESH JOSHI, MANJUL KUMAR, P N GAJJAR, B Y THAKORE AND A R JANI	137–141
BaTi _{0.4} Zr _{0.6} O ₃ solid solution phase formation kinetics and reaction mechanism through solid oxide reaction S K ROUT AND S PANIGRAHI	143–147
Dielectric study on sol gel derived BTZ film deposited by spin coating technique S K ROUT, T BADAPANDA, E SINHA AND S PANIGRAHI	149–153

Transition metal doped ZnS nanoparticle systems and their response
to swift heavy ion irradiation

U DAS, D MOHANTA, F SINGH, A TRIPATHI, D K AVASTHI AND A CHOUDHURY 155–159

Superconducting parameters of metals and alloys : HFP technique

JAYPRAKASH YADAV AND S M RAFIQUE 161–165

SPECIAL ISSUES

Special Issue on Atomic and Molecular Physics – Part I

Computational strategies for redox processes in condensed phase :

Both explicit and implicit solvation treatments

NITAL MEHTA AND SAMBHU N DATTA 851-869

A minimum electrophilicity perspective of the HSAB principle

P K CHATTARAJ AND S GIRI 871-879

Relativistic Hamiltonian for neutral atom of spin-1/2 nucleus in
homogeneous magnetic field

ANIRBAN MISRA AND SAMBHU N DATTA 881-888

Scattering resonances in low-energy H^+ + CO collisions

F GEORGE, T J DHILIP KUMAR AND SANJAY KUMAR 889-900

Structure, energy and IR spectra of $K-nNH_3$ cluster : A theoretical study

A K PATHAK, T MUKHERJEE AND D K MAITY 901-913

Operator equation of motion in phase space and path integral solution to
time-dependent systems possessing invariants : Application to
time-dependent harmonic oscillator

ASISH K DHARA AND SWAPAN K GHOSH 915-924

The Curl equations for an induced Renner-Teller type model

BIPLAB SARKAR AND SATRAJIT ADHIKARI 925-945

Special Issue on Atomic and Molecular Physics – Part II

Aspects of electron dynamics in a helium atom under an intense laser field

MAINAK SADHUKHAN AND B M DEB 969–981

Approximate construction of local complex potentials for a time dependent wave packet based treatment of vibrational excitation cross-sections in resonant e-N₂, e-CO and e-H₂ scattering

RAMAN K SINGH, MANABENDRA SARMA AND MANOJ K MISHRA 983–1002

On the electronic nonadiabatic effects in the H + H₂ reaction dynamics

B JAYACHANDER RAO AND S MAHAPATRA 1003–1021

Study of isolated 1 : 1 Al³⁺.He complex using many-body perturbation theory : A multi-reference approach

SUDIP CHATTOPADHYAY, UTTAM SINHA MAHAPATRA AND RAJAT K CHAUDHURI 1023–1037

Force, quantum mechanics and approximate energy eigenstates

C DAS AND K BHATTACHARYYA 1039–1059

Shape resonance in electron molecule scattering using coupled cluster method

SOURAV PAL, NAYANA VAVAL AND SAJEEV 1061–1067

Selective interchannel coupling as computational strategy to interpret complex atomic spectrum

H R VARMA, T BANERJEE AND P C DESHMUKH 1069–1077

Electronic structure of ZnS nanotube : a density-functional study

SOUGATA PAL, BIPLAB GOSWAMI AND PRANAB SARKAR 1079–1093
